

SmileCare Clinic Website Redesign

UI/UX Design Task 1 – Future Interns (2026)

Project Overview

This project focuses on redesigning a local dental clinic website called SmileCare Clinic. The redesign improves user experience, trust, and lead generation through a clean, modern, and conversion-focused interface.

Business Type

Dental Clinic / Local Healthcare Service

Target Users

- Patients looking for trusted dental care
- Users searching for quick appointment booking
- Families looking for affordable dental treatment
- Mobile users searching for nearby clinics
- People looking for pain-free dental services

Design Goals

- Create a clean and modern clinic website UI
- Improve navigation clarity and accessibility
- Build trust using testimonials and service highlights
- Increase appointment bookings through strong CTA sections
- Ensure mobile responsiveness and usability

UX Decisions

- Large CTA buttons improve visibility and conversions
- Simple navigation improves usability
- Service cards help users understand treatments quickly
- Testimonials and ratings build trust
- Contact forms support lead generation

Color Palette

Primary Blue: #2B6CB0

Light Background: #EBF8FF

Dark Text: #1A202C

Secondary Text: #4A5568

Tools Used

- Figma
- Iconify
- Google Fonts

Conclusion

This redesign creates a professional and user-friendly digital experience for the clinic while improving trust, accessibility, and appointment conversion rates.
